TECHNICAL MANAGEMENT MASTER OF ENGINEERING

TECHNICAL MANAGEMENT MASTER OF ENGINEERING

Master's Programme direct studies

More and more, our dynamic economies require not specialists but people who can work across different disciplines. Future employees must have a wide range of skills and take a holistic approach, while also being able to make clear commercial decisions. The goal of our Master's in Technical Management is to train highly qualified interdisciplinarians with mathematical, technical, business and economic expertise.

- full-time
- part-time

Duration of Studies

- 3 Semester
(full-time studies)

Final Degree

- Master of Engineering (M. Eng.)

Entrance Requirements

- Bachelor's degree preferably in Logistics, Industrial Engineering, or Transportation Systems Engineering
- Very Good English (C1 European Framework of Reference for Languages)

Careers

Graduates will be able to take management and project responsibilities in production, services associated with production, and road and rail transportation businesses.

"After completing my Bachelor's degree in Industrial Engineering and gaining some work experience, I was looking for ways to develop my potential and advance my career. The Technical Management Master's programme was the best option for me to improve my management, production and logistics skills and to prepare me for the German job market through its modules and research projects. The programme offers a multicultural environment with supportive teachers and a welcoming atmosphere. The programme prepares graduates for jobs in project management, logistics, production and more."

Marco Chamagua, graduate

"Our programme equips students with multi-project management skills, interdisciplinary and intercultural competencies, and holistic problem-solving approaches. Graduates are highly employable and often have job offers before they graduate."

Prof. Dr. Jens Wollenweber, Professor for Transport Logistics

Transportation Networks information technology Engineering

Supply Chain Management Mobility Concepts
