TECHNICAL MANAGEMENT MASTER OF ENGINEERING

TECHNICAL MANAGEMENT MASTER OF ENGINEERING

Master's Programme direct studies

More and more, our dynamic economies require not specialists but people who can work across different disciplines. Future employees must have a wide range of skills and take a holistic approach, while also being able to make clear commercial decisions. The goal of our Master's in Technical Management is to train highly qualified interdisciplinarians with mathematical, technical, business and economic expertise.

- ☑ full-time
- ☑ part-time

Duration of Studies

- 3 Semester
(full-time studies)

Final Degree

- Master of Engineering (M. Eng.)

Entrance Requirements

- Bachelor's degree preferably in Logistics, Industrial Engineering, or Transportation Systems Engineering
- Very Good English (C1 European Framework of Reference for Languages)

Careers

Graduates will be able to take management and project responsibilities in production, services associated with production, and road and rail transportation businesses.

„I have already completed my bachelor's degree in Wildau and have always felt very comfortable here. Especially the proximity to the teaching staff and the small study groups coupled with the strong practical relevance were decisive for me in choosing the place of study. The graduates have access to a wide range of jobs - from project management to executive positions“

Jonas J., graduate

„Our students expand their mostly technical background with multi-project management skills as well as interdisciplinary and intercultural competencies. They achieve solutions not through pigeonhole thinking, but through holistic approaches. As a result, our graduates usually have their employment contract in the bag even before completing their studies.“

Prof. Dr. Jens Wollenweber, Professor for Transport Logistics
