About us	MTU Maintenance Berlin-Brandenburg GmbH manages the largest engine portfolio in the MTU Maintenance network. The location in Ludwigsfelde specializes in engines from Pratt & Whitney Canada, as well as engine models from GE. In addition, the company is responsible for the maintenance of GE's LM series industrial gas turbines and their packages. The portfolio also includes component repairs for engines. The repair division offers a diverse range of services in metal finishing for new and repaired parts.
