

Company Profile

 VEINLAND GmbH	
We are looking for students from the degree programmes	Automatisierungstechnik Maschinenbau Technical Management Wirtschaftsinformatik Wirtschaftsingenieurwesen
We offer	Internship Working student position Graduate position School internship Apprenticeship
Sector	Development and production of hardware and software for industrial and maritime applications
Number of employees	50
Locations	Branch Prenzlau and Branch FARD
About us	VEINLAND GmbH develops hardware and software for industrial and maritime applications – from PCB design to user interfaces. Our systems capture, distribute, and visualize operational data on ships worldwide, improving efficiency and reducing CO2 emissions. Our portfolio includes ship performance monitoring systems, BNWAS, NMEA interfaces, DCU, UPS, sensors, as well as networking and cybersecurity solutions. We also offer industrial systems, prototypes, and series production. Together with Fard lighting, we provide LED and customized lighting solutions. Quality, safety, and sustainability are core priorities.
