About us	miscea GmbH develops and manufactures intelligent touchless hygiene solutions for the global healthcare and professional markets. Our award-winning Smart Hygiene Systems combine industrial design, sensor technology, water innovation, electronics and software to create products that improve hygiene, conserve resources and redefine the user experience. In 2026, miscea received the PLUS X AWARD – Design Innovator of the Year in the Smart Hygiene Solutions category, recognising our ability to combine technological innovation, intuitive usability and sustainable design. As an international technology company, we develop our products entirely in-house – from concept and mechanical engineering to electronics, embedded software, mobile apps and cloud-based web applications. At miscea, engineers work in multidisciplinary teams, take ownership from day one and contribute to innovative products that are used worldwide.
