

## Einrichtung Nextcloud Client - IOS (Apple) -

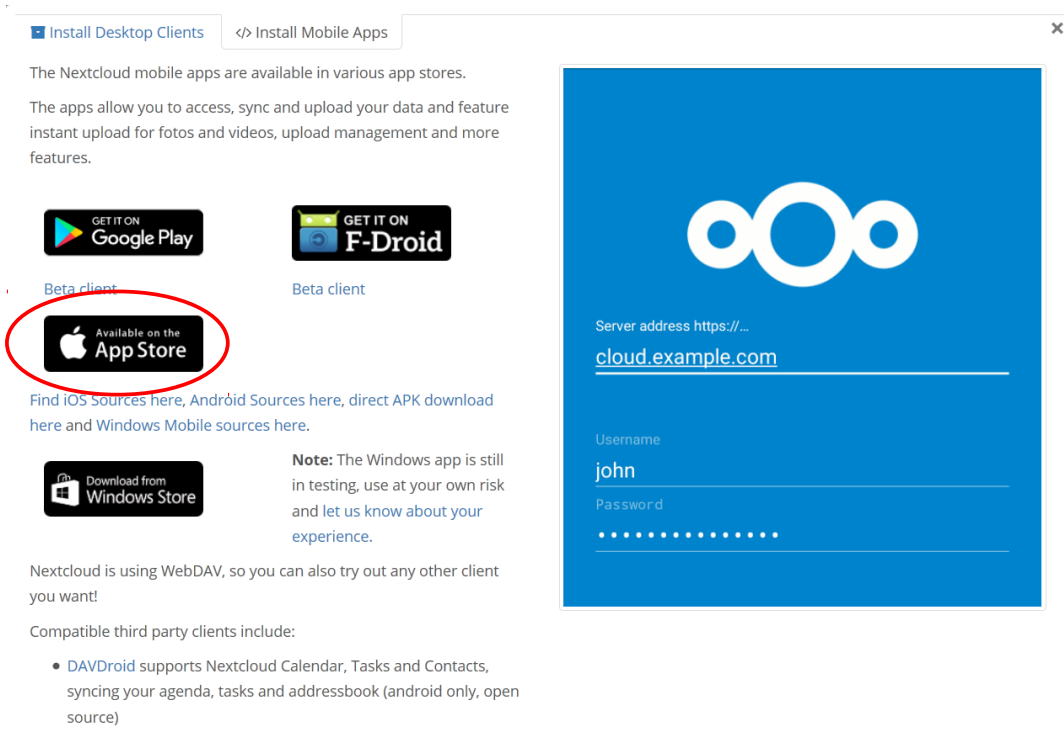

### Auswahl Programm zur Synchronisierung

Gehen Sie auf über den Link

<https://nextcloud.com/install/#install-clients>

Auf diese Seite und wählen Sie für Ihr Gerät und dem entsprechenden Betriebssystem die App.

IOS → AppStore

The screenshot shows the 'Install Mobile Apps' section of the Nextcloud installation page. It features several app store logos: Google Play, F-Droid, and the App Store (circled in red). Below these are links for finding sources and a note about the Windows app. On the right, a login form is visible with fields for 'Server address', 'Username', and 'Password'.

Install Desktop Clients <> Install Mobile Apps

The Nextcloud mobile apps are available in various app stores.

The apps allow you to access, sync and upload your data and feature instant upload for fotos and videos, upload management and more features.

GET IT ON Google Play

GET IT ON F-Droid

Beta client

Beta client

Available on the App Store

Find iOS Sources here, Android Sources here, direct APK download here and Windows Mobile sources here.

Download from Windows Store

**Note:** The Windows app is still in testing, use at your own risk and let us know about your experience.

Nextcloud is using WebDAV, so you can also try out any other client you want!
