

# Manual “Login to Webex conference”

This document will show you how to participate in the Webex online conference SusRES 2020 as a viewer. If you have successfully registered for the conference, you just have to follow this manual guide.

An example page from the document "schedule\_SusRES\_2020" is shown in the figure below. That document contains information about the schedule and content of the conference. For each presentation, a table is shown. In addition to the most important information about the presentation, there is a link in the last row of each table as marked in the figure below.

 **1st German-West African Conference on Sustainable, Renewable Energy Systems**   
SusRES – Kara 2020  
July 1st-2nd 2020, Université de Kara

.....

There will be a break from 14:00 to 15:00. The panel discussion will take place at 14:30 and lasts about 15 min.

<b>Center - Renewable Energy Systems Panel Discussion</b>	
<b>Begin: 14:30</b>	<i>Speaker: Prof. AMOUZOU Sabiba Kou'santa</i>
01.07.2020	<i>and Associate Prof. ADANLETE ADJANOH Assiongbon</i>
Panel 3	<b>Content:</b> Discussing the necessity of a joint "center for renewable energy system"
<b>Chair:</b>	<b>Prof. Jörg Reiff-Stephan</b>
<b>Link to presentation:</b>	<a href="https://th-wildau.webex.com/th-wildau/jonstapejo.nhp?MTID=e11eb6d5b81d54b9e020f03515eb618ce">https://th-wildau.webex.com/th-wildau/jonstapejo.nhp?MTID=e11eb6d5b81d54b9e020f03515eb618ce</a>

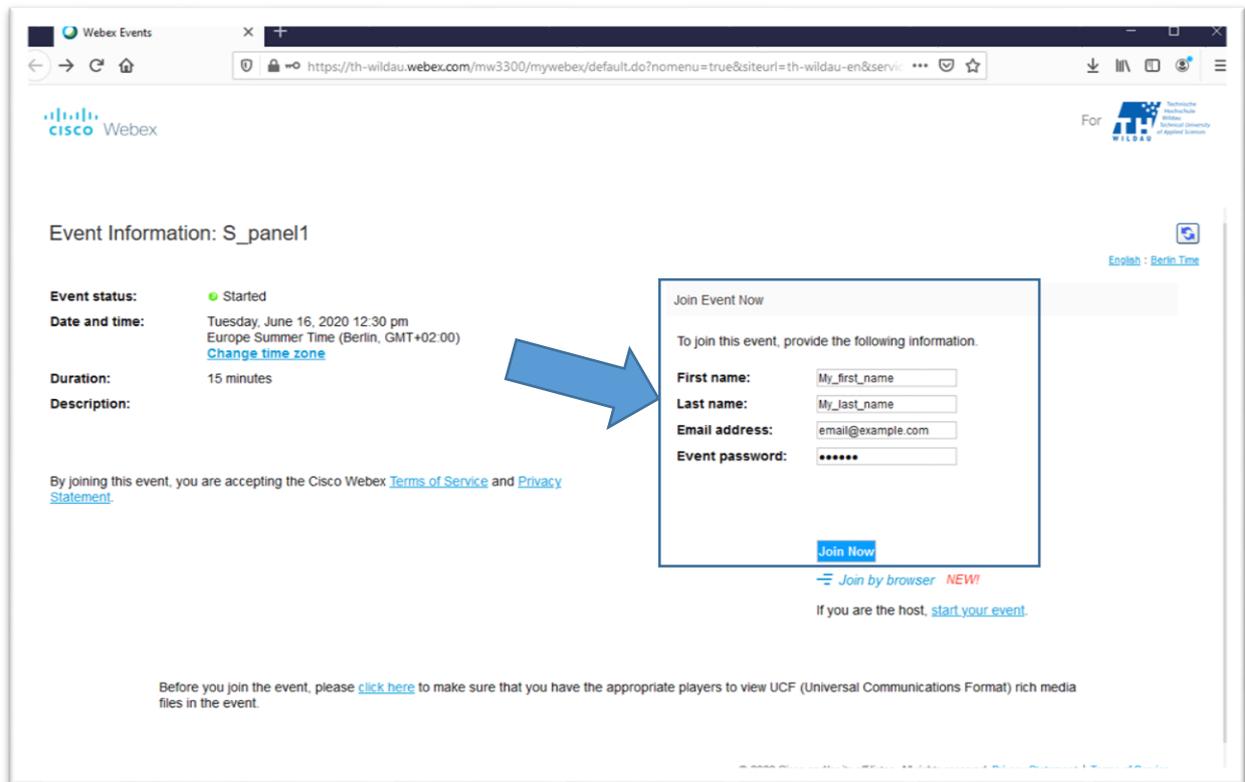

.....

<b>Solar power in product development</b>	
<b>Begin: 15:00</b>	<i>Speaker: Prof. Jörg Reiff-Stephan</i>
01.07.2020	<b>Abstract:</b> A large part of the African continent suffers under the burden of poverty. The West African Republic of Togo suffers particularly heavily. Significant for the region is the very poorly developed energy grid. The lack of dependable power retards development in both economic and educational institutions. To promote development in the country, the University of Applied Sciences Wildau aims to support project work in the field of harnessing renewable energy, with the goal of "helping through self-help". In the article an analysis of the savanna region's climatic conditions is performed to identify potential renewable energy sources. The main topic of the paper is to identify the optimal decentralized, renewable energy system for the region. Following that, the possibility of meaningful utilization for conversion into mechanical power is demonstrated in a case study of a brick making machine. A calculation basis for the design of appropriate performance requirements is derived. With this, a sustainable improvement to the living conditions in West Africa can be made.
<b>Chair:</b>	<b>Prof. Lotz, D. Oiese</b>
