<sup>3</sup>Technische Hochschule Wildau, Germany

Please enter the correct Institution of the respective author and assign the correct identifier -> Max Mustermann<sup>1</sup>

**Abstract.** The abstract should summarize the contents of the paper in short terms, i.e. in up to 250 words.

**Keywords:** First keyword, second, third keyword

Provide at least three keywords and an abstract

## First Section

### Subsection

Please notice that there is no indent in the first paragraph of a section or subsection. There is also no indent in the first paragraphs which follow a table, figure, equation, etc.

New text following a table, figure, equation, etc. is not indented

Three

Please  
the text.

Figures X and Table X in bold letters

Figure and Table description NOT in bold letters

defined in

ing for

**Table 1.** Table captions should be placed above the tables.

Hazard Class	A 1 to A III
Flash point	< 21° C/ > 55° C
Density at 15° C	720 kg/m <sup>3</sup> to 860 kg/m <sup>3</sup>
Kinematic Viscosity	0,65 to 4,0 · 10 <sup>-6</sup> m <sup>2</sup> /s

Tables and Figures should be centered.

- Bullet points may be used
- ...

1. Numbering may be used, too.
2. ...

Equations should be centered and set on a separate line.

$$x + y = z$$

(1)

Whenever possible, use vector graphics and try to avoid rasterized images.
